Because Peak 10 + ViaWest is continuously investing in infrastructure and networks, we ensure the most current technologies, vital security features and skilled expertise to protect your assets. Our highly-flexible environment is designed to efficiently support your technology, space and connectivity requirements, and grow with these needs into the future, including:

- Highly secure protocols and environmental conditions promote security
- [Seamless, high-performing connections](#) to the world
- 100% uptime, guaranteed

Security and Compliance You Can Trust

Your technology is the backbone of your business operations, and its security is critical to your success. With multiple physical and operational security features and proven protocols, Peak 10 + ViaWest data centers offer the protection your business can depend on. Around-the-clock monitoring, rigid sign-in protocols, biometric scanners and card/PIN access further protect your assets. For added peace of mind, we undergo yearly independent audits and attain key certifications to confirm our own [compliance](#) with the critical standards that support your legal and regulatory obligations.

Connect Your Business to the World

Peak 10 + ViaWest data centers seamlessly connect your business, whether it's between our data centers or our data center and anywhere across the globe. Our Internet service, intra data center MPLS, cross connect and Ethernet connect – as well as our carrier-neutral status and always-expanding list of carriers – provide the connections to support your communication and power your business growth. To enhance your capabilities and promote the efficiency of your reach, we also enable metro Ethernet, external MPLS connections and direct connect to third-party providers.

Reliable Uptime for Peak Performance

When you don't have time for [downtime](#), rely on Peak 10 + ViaWest to ensure the availability of your most essential workloads. Our highly resilient environment offers built-in redundancies and environmental controls to assure no single points of failure for guaranteed 100% uptime. Our proven practices heighten this enduring accessibility and offer hourly patrols by experienced technicians trained to identify and rectify issues before they can impact your operations. All of these efforts ensure the availability of your business systems.

Top-tier Facilities without Breaking the Bank

With Peak 10 + ViaWest, there is no need to compromise on your expectations. Our leading-edge facilities offer enterprise-grade infrastructure, innovative technology and service expertise delivered within your budget. Designed to meet the highest industry standards, our growing footprint of data center locations supply the space, security, power and bandwidth your business needs without the burden of maintaining, updating and securing the facility, its technology and network. The result is a uniquely tailored solution that your technical and financial requirements.

Customer-focused – All Day, Every Day

Your business doesn't just need a colocation provider, you need a partner. Whether you are onboarding, enhancing services or needing support, our customer-centric approach ensures your environment is configured to meet your unique specifications.
