

# A Complete Solution for Compliance Challenges

## The HIPAA Compliance Package

Peak 10's HIPAA Compliance Package accounts for all aspects of HIPAA technology requirements so that your organization doesn't miss a beat.

- Compliance Security Services
- Audit and Compliance Support
- Business Associate Agreement (BAA)
- Cloud-based Disaster Recovery

IT professionals in the healthcare industry have their hands full between electronic health records (EHR) implementation and optimization, the persistent need for more internal resources and ever-evolving federal regulations, HIPAA in particular. Storing, transmitting or processing Protected Health Information (PHI) means compliance with HIPAA, period.

Peak 10's portfolio of colocation, cloud and managed services is structured to ease the burden on customers seeking compliance, specifically in regard to the Health Insurance Portability and Accountability Act (HIPAA) Security Rule. At Peak 10, we've been working alongside healthcare organizations since our beginning in 2000 and take pride in offering first-rate data center services, as well as being one of the largest HIPAA-compliant clouds and HIPAA-compliant colocation providers in the world, based on the number of signed business associate agreements (BAAs).

The HIPAA Compliance Package is designed to help healthcare customers meet HIPAA compliance mandates and have more breathing room to focus on mission-critical organizational initiatives.

Peak 10 doesn't just work with healthcare organizations as their service provider. Peak 10 is a trusted partner, committed to helping customers in the healthcare industry harness the power of IT to deliver better care and drive better results, as well as to meet their business requirements.

To learn more about how the HIPAA Compliance Package can work for your organization, contact a Peak 10 healthcare IT expert today at (866) 473-2510 or [solutions@peak10.com](mailto:solutions@peak10.com).
